

# PERRY JOHNSON LABORATORY ACCREDITATION, INC.

## Certificate of Accreditation

Perry Johnson Laboratory Accreditation, Inc. has assessed the Laboratory of:

### Toll Company

3005 Niagara Lane North, Plymouth, MN 55447

(Hereinafter called the Organization) and hereby declares that Organization is accredited in accordance with the recognized International Standard:

ISO/IEC 17025:2005

This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (as outlined by the joint ISO-ILAC-IAF Communiqué dated January 2009):

Chemical Calibration (As detailed in the supplement)

Accreditation claims for such testing and/or calibration services shall only be made from addresses referenced within this certificate. This Accreditation is granted subject to the system rules governing the Accreditation referred to above, and the Organization hereby covenants with the Accreditation body's duty to observe and comply with the said rules.

For PJLA:

Initial Accreditation Date:

Issue Date:

Expiration Date:

April 9, 2009

June 16, 2017

September 30, 2019

Accreditation No.:

Certificate No.:

64630

L17-254

Tracy Szerszen President/Operations Manager

Perry Johnson Laboratory Accreditation, Inc. (PJLA) 755 W. Big Beaver, Suite 1325 Troy, Michigan 48084 The validity of this certificate is maintained through ongoing assessments based on a continuous accreditation cycle. The validity of this certificate should be confirmed through the PJLA website: <a href="www.pjlabs.com">www.pjlabs.com</a>

## Certificate of Accreditation: Supplement

#### **Toll Company**

3005 Niagara Lane North, Plymouth, MN 55447 Contact Name: Chuck Allard Phone: 763-551-5300

Accreditation is granted to the facility to perform the following testing:

#### Chemical

MEASURED INSTRUMENT, QUANTITY OR GAUGE	RANGE OR NOMINAL DEVICE SIZE AS APPROPRIATE	CALIBRATION AND MEASUREMENT CAPABILITY EXPRESSED AS AN UNCERTAINTY (±)	CALIBRATION EQUIPMENT AND REFERENCE STANDARDS USED
Calibration Gas	0.000 01 % mol fraction to	0.000 05 % mol fraction to	Electrolytic Hygrometer
Cylinder <sup>F</sup>	0.01 % mol fraction	0.000 5 % mol fraction	
	0.000 01 % mol fraction to	0.000 02 % mol fraction to	Flame Ionization Detector
	10 % mol fraction	0.23 % mol fraction	
	0.000 01 % mol fraction to	0.000 02 % mol fraction to	Electrochemical Oxygen
	23.0 % mol fraction	0.23 % mol fraction	Analyzer
	0.01 % mol fraction to	0.02 % mol fraction to	GC with TCD
	100 % mol fraction	2 % mol fraction	
	0.000 01 % mol fraction to	0.000 02 % mol fraction to	GC with Pulsed Discharge
	0.1 % mol fraction	0.002 % mol fraction	Ionization Detector – PDID
	1.0 % mol fraction to	0.1 % mol fraction	Paramagnetic Oxygen
	100 % mol fraction		Analyzer
	1.0 % mol fraction to	0.2 % mol fraction to	TCD
	100 % mol fraction	2 % mol fraction	
Gravimetric Balance	0.000 01 % mol fraction to	0.000 1 % mol fraction to	Gravimetric Balance
Gas Mixture	100 % mol fraction	1 % mol fraction	
Concentration <sup>F</sup>			

- 1. The CMC (Calibration and Measurement Capability) stated for calibrations included on this scope of accreditation represents the smallest measurement uncertainty attainable by the laboratory when performing a more or less routine calibration of a nearly ideal device under nearly ideal conditions. It is typically expressed at a confidence level of 95 % using a coverage factor k (usually equal to 2). The actual measurement uncertainty associated with a specific calibration performed by the laboratory will typically be larger than the CMC for the same calibration since capability and performance of the device being calibrated and the conditions related to the calibration may reasonably be expected to deviate from ideal to some degree.
- 2. The laboratories range of calibration capability for all disciplines for which they are accredited is the interval from the smallest calibrated standard to the largest calibrated standard used in performing the calibration. The low end of this range must be an attainable value for which the laboratory has or has access to the standard referenced. Verification of an indicated value of zero in the absence of a standard is common practice in the procedure for many calibrations but by its definition it does not constitute calibration of zero capacity.
- 3. The presence of a superscript F means that the laboratory performs calibration of the indicated parameter at its fixed location. Example: Outside Micrometer<sup>F</sup> would mean that the laboratory performs this calibration at its fixed location.
